Memorandum

June 1, 2002

To: NWCG Members, Working Team Chairs, GACG Chairs, NMAC Chair

From: Chair

Subject: Crew Standards

During the May 2002 meeting, NWCG reviewed and discussed the recommendations from the Incident Operations Standards Working Team (IOSWT) for fire crew typing. This project has had considerable field input and comments that we have added into this final format. These standards include both short-term (2002) and longer-term implementation (2003 and beyond).

For fire season 2002, crew standards providing for Type I IHC, Type II, IA, Type II, and Type III proposed by the IOSWT at the May 2002 NWCG meeting are adopted, with the following changes:

1. The standard shall be titled *Minimum Crew Standards for Mobilization*.
2. Fireline capability of Type III crews will include fireline construction.
3. Leadership qualification for Type III crews will require one crew boss and two FFT1.
4. Communications requirements for Type III crews will require three programmable radios.

The only exceptions to the NWCG crew standard will be for crews where contract bids were secured prior to the issuance of this standard.

Beginning January 1, 2003, crew standards providing for the Type I IHC, Type I, Type II IA, Type II, and Type III crews are adopted with the following changes:

1. Fireline capability of Type III crews will include fireline construction.
2. The standard shall be titled *Minimum Crew Standards for Mobilization*.

I have attached the IOSWT tables that define all criteria used to identify each crew standard for the 2002 fire season and the January 1, 2003, standards listed above.
